

Standard Design Specification

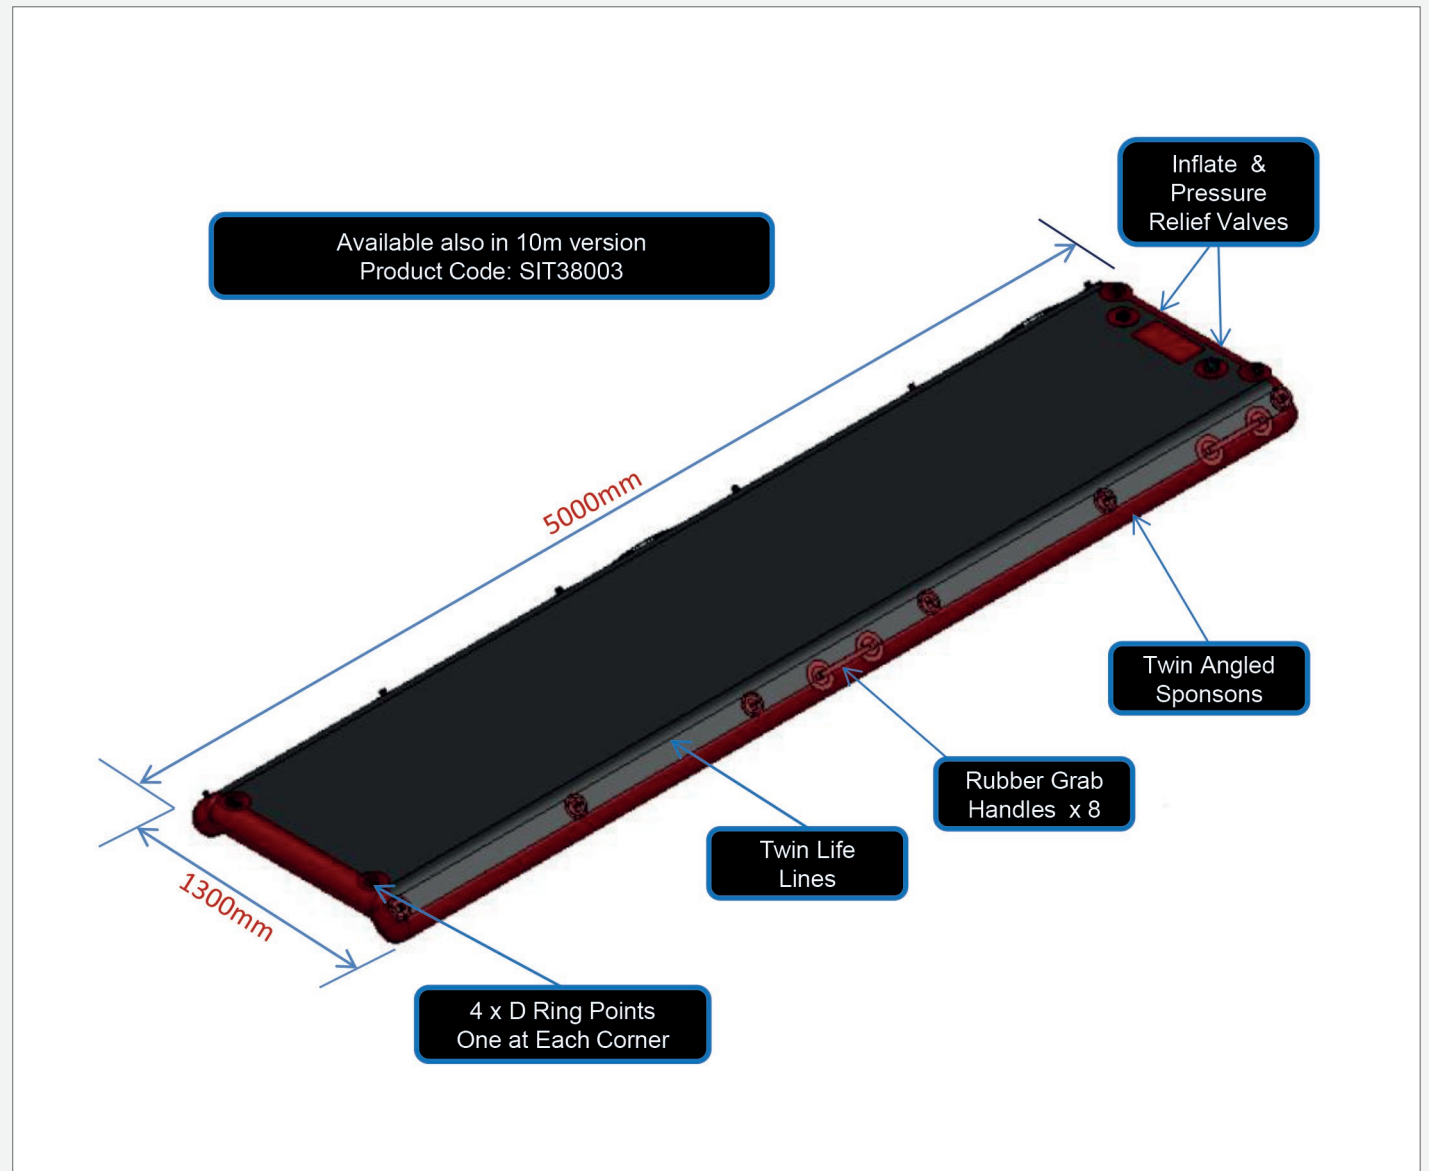

Product Code: SIT38002 - ResQsled Plus

The ResQpath provides a stable working platform that is suitable for use in mud, water and soft ground. It's fitted with angled sponsons which reduce problems with suction. It can be inflated using a compressed cylinder for rapid inflation, and it is possible to join two paths together to make a longer access platform if required.

Standard Features

Orca® Hypalon Fabric Construction	
15cm Neoprene Protective Coated Floor	
Rubberised Grab Handles	8
